```

Brand Specifications

Colors (from SVG): - Primary Blue: `#044f9d` - Primary Red: `#c3202e` - White: `#ffffff`

Typography Hierarchy: - H1-H3: Libre Baskerville (black) - H4-H6: UglyQua (black) - Body: Work Sans (black) - Navigation/Buttons: UglyQua - Banner Text: ArmaliteRifle (red, uppercase)

Responsive Breakpoints

- Desktop: 1025px+ (full width banner, desktop navigation)

- Tablet/Mobile: 1024px and below (hamburger menu)
 - Tablet Portrait (768-1024px): 500px max banner
 - Phone Portrait (<768px): 280px max banner
 - Phone Landscape: 350px max banner
-

Site Structure Established

Pages Created

1. Home
2. Events (with Tockify calendar integration)
3. News (with featured story, subscribe banner, newsletter archive)
4. Order Signs/Shop (WooCommerce)
5. Get Involved (Join Us)
6. About
 - History (submenu)

Navigation System

- Desktop (1025px+): Horizontal menu below banner with hover dropdowns
 - Mobile/Tablet (1024px and below): Hamburger menu with toggle arrows
 - All internal links using WordPress page references (not hardcoded URLs)
 - Submenus: News → Latest News, About → History
-

CSS Framework Ready

Available Content Classes

```

/* Buttons */
.la-button           // Red button, white border
.la-button-secondary // Blue button
.la-button-large      // Large button for CTAs

/* Content Boxes */
.la-text-box         // Standard bordered box
.la-highlight-box    // Blue border, red accent

/* Layout */
.la-two-column       // Flex two-column
.la-section          // Standard section padding

/* Utilities */
.la-text-center/left/right
.la-bg-blue/red/white
.la-mt-1/2/3         // Margin top
.la-mb-1/2/3         // Margin bottom
.la-p-1/2/3          // Padding

```

Major Updates & Fixes

Migration to Live Domain (2024)

- Completed 301 redirects from staging (bpx.ela.mybluehost.me/website_97a098b6)
- Updated all URLs to lexingtonalarm.org
- Verified all internal links and menu references

WooCommerce Integration

- Three-category product system:
 - Local pickup items
 - Shipped items
 - Printful merchandise (separate fulfillment)
- Shipping class validation to prevent incompatible cart combinations
- Email automation through SendLayer/WP Mail SMTP
- Mailchimp newsletter integration (400+ subscribers)

Events Page Implementation (September 2024)

- Two-tier display: Featured events (pinboard) + Full calendar (monthly view)
- Tockify calendar integration with "featured" tag filtering
- Responsive design with brand-consistent styling
- See: `Events_Page_documentation.txt` for full details

News Page System

- Featured story section with image and excerpt
- Subscribe banner with Mailchimp integration
- Newsletter archive with blog post listings
- Single post layout with centered titles and featured images
- Automatic title hiding on page view (shown only on single posts)

Mobile Menu Fix (November 2024)

Problem: Dropdown arrow buttons were oversized compared to menu text, creating visual imbalance and poor UX.

Solution Implemented: - Increased main menu text size to 1.25rem for better readability - Reduced dropdown toggle buttons from 28px to 24px square - Reduced arrow icons from 14px to 12px for proper proportion - Set submenu text to 1.1rem (smaller than parent items for hierarchy) - Adjusted padding and spacing for better touch targets - Maintained red background with white border for brand consistency

Technical Details: - Applied to screens 1024px and below - Uses flexbox for proper alignment - Font family set to UglyQua for consistency - Line-height optimized at 1.4 for readability

Result: Professional, balanced mobile menu with clear visual hierarchy and proportional elements.

Desktop Navigation Behavior

- Hover shows submenu dropdown
- Click on parent item navigates to page (News, About)
- Submenu items styled with red boxes on transparent background
- All dropdown arrows hidden on desktop view

Touch Device Handling

- Breakpoint set at 1024px to force hamburger menu on tablets
 - Prevents hover-based navigation issues on touch screens
 - Mobile menu uses toggle arrows for submenu expansion
 - First tap on parent item navigates to page
 - Toggle arrow expands submenu independently
-

Known Issues & Notes

Current Configuration

- Font paths use root WordPress directory structure
- All menu items use page references (auto-update on changes)
- Mobile and desktop headers configured separately in Kadence
- Social media icons positioned correctly across all screen sizes

Maintenance Reminders

- Clear all caches after CSS changes
 - Test navigation on actual touch devices (not just browser emulation)
 - Safari Responsive Mode uses mouse hover (doesn't replicate true touch behavior)
-

Active Features

E-Commerce

- WooCommerce with Stripe integration (Payment Plugins)
- Three fulfillment workflows (local pickup, shipping, Printful)
- Cart validation to prevent mixed shipping classes
- Automated order notification emails with category tags

Email & Communication

- SendLayer SMTP for reliable delivery to ProtonMail
- Mailchimp for newsletters with automated welcome sequences
- Volunteer tagging system for segmentation

Calendar & Events

- Tockify integration with monthly default view
- Featured events filtering via tags
- Responsive display across all devices

Forms

- WPForms Pro for contact and volunteer signup
- Direct email delivery (no database storage)
- Custom styling with brand colors

Technical Contacts & Resources

Hosting: Bluehost (dedicated account for Lexington Alarm)

Theme: Kadence (free version)

Critical Files: - Custom CSS: WordPress Customizer → Additional CSS - Banner:

`/uploads/2025/09/LexAlarmBanner8.svg` - Fonts: `/themes/kadence/fonts/`

CSS Maintenance Notes

The CSS file (~1400+ lines) is organized in sections: 1. Custom Properties/Variables 2. Font Definitions 3. WordPress/Kadence Overrides 4. Typography 5. Header & Banner 6. Navigation (Desktop & Mobile) 7. Buttons 8. Content Boxes 9. Layout Components 10. Footer 11. WooCommerce/Shop Grid 12. Dropdown Menu Styles 13. Forms 14. News Posts & Display 15. Mobile Hamburger Menu Styling 16. Social Media Icons 17. Navigation Behavior Fixes 18. Utility Classes 19. Mobile Responsive

Mobile/tablet responsive rules are consolidated with media queries throughout for easy maintenance.

Future Enhancements

Priority Items

- Complete "Get Involved" page with volunteer signup forms and committee selection
- Social media integration in site header (partially complete)
- Donation system with variable pricing options
- Speaker videos archive from recent rallies
- Letter-writing campaign tool for constituent outreach

Content Development

- Expand historical content for 250th anniversary (2025)
- Build out event management with RSVP systems
- Newsletter template refinement in Mailchimp
- SEO optimization across all pages

Document Version: Stage 1 Complete + Mobile Menu Fix

Last Updated: November 2024

Next Focus: Get Involved page completion, social media integration, donation system expansion
